

Help your business clients manage through uncertainty

As the COVID-19 pandemic disrupts day-to-day operations and planning of middle market companies across the country, Chubb is committed to providing you with research and business insights that help your clients run their business with confidence.

Below you'll find resources to share with clients to help them develop both short- and long-term plans. To realize the greatest benefit from these resources, we recommend you:

- Identify clients for whom the information may be valuable
- Forward them the links while calling attention to items of interest
- Follow up in a week to see if they have any questions

During these unsettling times, we want to reinforce our commitment to you and our mutual clients. While most Chubb colleagues are now working from home, rest assured we remain available to provide the same level of service you have come to expect.

Reduced occupancy and premises shutdown

Vacant or sparsely occupied properties can present unique risks. From potential for pipes to freeze to hazards for individuals who visit the property, this can result in increased frequency or severity of loss. When managing an unattended building, use these tips to help mitigate risk exposures.
